## Institute Notes.

Twenty-two names were added to the list of last week, Monday morning, which makes the present caroliment one hundred and electeen. Troy is at present blessed with over sixty of the

invulnerable, so quaintly described in the old poem, "Bachelor's Sale;" still, a vendue would prove very hazardous, as there isn't enough men who wear pigeon-tails over the age of thirty. Moral-a less number of school mothers, and more of the fathers.

The Chief puts it rather hard on the "marma," in last issue; but "ye local" believes in taking things as they are meant, and not said. Brother Miller s means they needn't steal a "Quaker's fip," unless they want one.

Prof. McCarty delivered his scientific lecture be

fore the County teachers, at the M. E. church, Thursday evening last. To simply say it was profound, scarcely do justice to the scope of the Pro fessor's thought; and to say that any chance evolu-tionist who heard him, still thinks that somebody's great-great-grandfather was a monkey, would be to say such an one is rather looney. About forty of the teachers convened at the school

house, on last Saturday, at 4:30, p. m., for the purpose of a general "quiz." To call things by their proper names is to say, that the boys want to chat the girls, and the girls to catch a "feller."

A match game of base ball was played between the Troy boys, (most of them little tads, too,) and a select nine of the teachers attending the Institute, or July 31st. A knowledge of the rudiments of science was soon found to be very different to base ball. The teachers lacked the muscle, and were scooped-acore,

. A growing interest is manifested from day to day, every department of the Institute. Too much praise cannot be given Supt. Heeney and the professors, for the manner in which they are con their work. Every teacher who works as he should during the present month, and goes into the school room the coming year with a will to do his whole duty, will leave a record of which he may justly feel

We would suggest the idea of "more charity" regarding the opinions of any one, and especially when a Mr. Butler or Mr. Clark assert a thing to be true, it by no means follows that their assumption is true.

A movement is on foot to establish a permanent Teachers' Association. The idea is certainly a good one, and should be acted upon at once. If such an organization is effected, meetings will be held in different parts of the County, every month or two, and an opportunity will then be afforded many of the School Boards to become acquainted with the teach-ers of true worth and spirit. This movement is not solely for the purpose of intellectual benefit, but to educational interest generally, as well as to work up a more hearty co-operation be-

tween teacher and patron.

Prof. Robinson, of Highland, favored the elecution class in Grade 1, by reading "The Bells" and "The Smack in School," Monday morning. He is said to be a good elecutionist.

At the Institute, as well as on the street, the qu ries are raised, "Where are the best schools I" or "Do you know of a vacant school at at a reas salary?" It is natural these questions should be sprung at this time, and because the 14th of this month will soon have passed, and the time to conthat School Boards will recognize culture, as well as look carefully to the training in the art of teaching each applicant has undergone, ere they hire. They well know, the true physician, lawyer, or merchant, is a careful and constant student, and never plodding at two or three things at the same time, expecting to straining in this way. The closest care and attention is given to all work in which any degree of success is ed. The teacher's work is now rightly recog nized as a profession, and here and there, all over the land, "Normal Institutes" have been inaugura that the teachers may better prepare them their chosen mission, and keep posted in the very best methods of instructing. Every teacher who tress ures the vital interests of his work, is a lover of the Institute, and, therefore, is a "home" teacher. Home tries are carefully fostered and fed, and thus it should be with the profession that woulds and build up the minds of those who, in a few years, will shape

Excursion, we will say that all efforts to get reasonable rates have failed. The railroad managers, who have control of the excursion business, have shown a lack of frankness, and a disposition to shyster, we may call it, and have seemed to discriminate against

Board adjourned, Tuesday afternoon, to meet Mon-An Important Goological Fact.

An Important Geologichi Facc.

Geology has shown us that nature accomplishes or greatest revolutions in the earth's surface conformation slessly. Every year the river makes it channel deeper, the glacier wears a deeper gorge in he Alpine rock, and the occan tide deposits the sand it has crumbled from the rocks upon which it breaks We note the carthquake and the devantating burreane; but these changes are so gradual man seldon observes them until the channel has become over cane; but these changes are so gratial man scuous observes them until the channel has become overhanging cliffs, or a mountain has disappeared before the ley stream, or the ocean has given us a Florida. Thus it is in disease. Our attention is attracted by acute diseases, of fevers, cholors, etc., while chronic diseases (often the most dangerous in result,) being slow in their development, are seldom noticed until they have made an alsmost ineffaccable impression upon the system. Persons believing thomselves comparatively healthful are oftimes the victims of these diseases, and only become aware of their presence when relief is almost impossible. Diseases of the liver and stomach are the commonsest of those chronic affections. Dr. Pierce's Golden Medical Discovery and Picasant Purgative Pellets are never-failing resceives for these diseases. They produce a beauthful accretion of the bile, prevent milgantics by regulating the bowels, and impart a vigorous tone to the whole system.

They are colly taking in their little \$10 per lot, and lon't give anything for it, except the little piece of ground described in their deeds. They should ex-pend a few dollars in giving the cemetery a decent appearance. It is now over-grown with weeds and bushes, which make it look like a wilderness. They should also improve the road leading to it. We shouldn't like to look at a corpse, after it had passed over this, one of the worst roads in the County. The trustees of the cemetery could easily afford to rave the way put in respectable condition for fur orteges.

Edward Franklin, father of Thomas H. Franklin,

Esq., of Doniphan, died at the residence of the lat ter, last Friday, at 1 o'clock, aged about seventy ears. He was buried in the Masonic Cemetery, o turday, at 4 p. m. A large number of his friend and acquaintances were in attendance at the funeral ceremony, which was conducted after the form of the Episcopal church—Mr. Franklin and family be-ing members of that church. There being no Episco-pal clergyman near at hand, Father Leak officiated. While in old Doniphan, I saw many old friend ome of whom I have known since my boyhood days. The most of the old settlers of Doniphan are now growing aged and gray. As I looked upon them, it made me feel sad. Soon they will be laid along side of their old neighbors and friends, "in that village on the hill." Doniphan has had more noted men than all the other towns in the County put together Duce the famous J. H. Lane lived there; als John A. Martin, and more than a score of others who have distinguished themselves both as politicians and soldiers. I met Hon. James F. Forman, Hon. A. Low, Hon. M. T. Landon, Dr. Welsh, W. H. Nesbit, Esq., and Hon. B. O'Driscoll-and why should I not ntion B. O'Driscoll? I have known him now wenty-five years. He gave me words of cheer long years ago, when I left home a mere boy, to fight ife's battles alone. He patronized me when I was a newsboy in the great city of St. Louis. He wrote me a kind letter when I was "busted" flat as a pan-cake in the city of New York, and commended me to a man who rendered me assistance, and started me in iness again-it only required a small amount to do so, for I was "only a newsboy." I like B. O'D., because he has a warm and generous heart. He wore the "gray," while I wore the "blue," still he is man—he has been "reconstructed," and says he is willing, at a moment's notice, to shoulder his gun nd fight for the old flag, along with OLD VET. P. S.-Why do your other itemizers any "we," all the time? Am I we, when I write for the Chief, too?

There will be good markets, and goo prices offered for all our farm products, which will afford us sufficient means to employ good, qualified teachers, and furnish other necessaries for carrying on good schools. We have got good school houses, of sufficient capacity to accommodate all the chil-dren of school age in both Districts, and there are large numbers of accomplished teachers in the Coun ty, who will want employment. Give our teachers employment, and educate our children, and prepare them for the duties, labors, and responsibilit their life. Organize lyceums, get up singing schools, and last, but not least, good spelling schools. Now, here is one thing of great importance. A person may be a good writer, and form good letters, but if the

words are not spelled properly, the writing is more difficult to read than when spelled properly, and leters not so well formed. It is very necessary to be good spellers.
